C-Soft

Authorised Bentley Systems channel partner
Visakhapatnam, India

Engineering software for the infrastructure you design and build

We supply, train and support CAD, structural and infrastructure software for civil engineers across India.

About C-Soft

C-Soft is an authorised Bentley Systems channel partner based in Visakhapatnam. We help civil and infrastructure teams choose the right software, set it up and learn to use it well. Because we work directly with the software makers, our customers receive genuine licences and proper support.

What you get when you work with us

Help choosing the right tools

Tell us what you design and we will recommend the software that fits your work, your team and your budget.

Genuine licences

Software supplied through authorised channels, so you are covered by the makers' licensing and support.

Set-up

We help you install and configure the software so your team can start work quickly.

Training

Practical training so engineers and drafters get the most from the tools they have bought.

Ongoing support

A local team you can call, email or message on WhatsApp when you need help.

Demos

See the software working on tasks like yours before you decide.

Software for every stage of a project

MicroStation	**Design and drafting**	2D and 3D modelling and drawing for infrastructure projects.
OpenRoads	**Roads and highways**	Corridor, drainage and site design in one model.
STAAD	**Structural analysis**	Analyse and design steel, concrete and other structures.
PLAXIS	**Geotechnical**	Model soil and rock behaviour for foundations and excavations.
ProjectWise	**Project collaboration**	Share drawings and models across teams with version control and approvals.
SYNCHRO	**Construction planning**	Link the schedule to the 3D model to plan, sequence and track construction.
Graebert Ares Commander / Ares Standard	**Affordable CAD**	Lower-cost CAD with a perpetual licence option, so you buy once and need not pay every year.
